Passionate, self-starter with two years of software development experience. I bring a unique perspective and creative problem-solving approach.

WORK EXPERIENCE

Vertrical

Software Engineer

San Francisco | Sep 2021 - Nov 2022

- Work as part of an agile team, develop new features based on specific requirements, fix bugs, refactor existing code and extend existing functionality
- Work on internal and external projects related to digital health
- External projects include working with Truepill and OptumRx to develop an insurance feature that allows customers to purchase OTC and prescription products
- Internal projects include developing a minimum viable product(MVP) that allows small and medium businesses to sell OTC products
- Participate in daily stand-ups and contribute to sprint planning
- Assist in the release process for the frontend
- Work in a full stack capacity working on both frontend and backend. Frontend work consists of ReactJS, NextJS and Typescript. Backend work consists of NestJS and Typescript.

Self Employed

Web Development Consultant

San Francisco | Jan 2021 - Oct 2021

- Brainstorm with team members to design solutions to a given problem
- Turn figma designs into web applications
- Build web applications using NodeJS, ReactJS,HTML and CSS

Goodtime

Operations

San Francisco | Feb 2019 - Oct 2020

- Serve as facility manager for our SF office with 30+ employees
- Manage vendors and contractors: planning for, purchasing, and upkeep of workstations, furniture, and employee supplies
- Work with HR to ensure employee happiness
