Self Employed

Web Development Consultant

San Francisco | Jan 2021 - current
- ·Brainstorm with team members to design solutions to a given problem
- ·Turn figma designs into a web application
- ·Build web applications using NodeJS, ReactJS,HTML and CSS

Goodtime

Operations

San Francisco | Feb 2019 - Oct 2020
- Manage vendors and contractors: planning for, purchasing, and upkeep of workstations, furniture, and employee supplies
- Serve as facility manager for our SF office with 30+ employees
- Work with HR to ensure employee happiness with their work environment, especially for fun events and office maintenance
- Keep our headquarters running smoothly and all of our team members happy

PROJECTS

Smart Sun

- Smart Sun is a sun exposure and vitamin D tracker integrated with Particle's iot device. Bases on the user's location it fetches weather data to determine the best time to go outside.
- Built with figma, heroku, iot, javascript, mongodb, node.js, particle, reactjs

microLend

- MicroLend is a crowdfunded microloans platform that connects lenders and borrowers. We have three users: lenders, borrowers and mentors
- Built with express.js, figma, heroku, kendo, postgresql, react, telerik

Pomo

- Pomo is uniquely designed to meet the needs of young students and educators. Utilizing the science-backed Pomodoro technique, Pomo helps students manage their time by breaking down assigned tasks into manageable intervals.

SKILLS

- Javascript
- NodeJS
- ReactJS
- SQL
- HTML
- CSS
